

## **HELP KEEP OUR CITY CLEAN!**

### **Notice of Trash Collection**

Posted on: May 29, 2018

The City is needing your cooperation with the following trash collection system:

Automated refuse trucks increase productivity and decrease chances for injury to our employees. Using hydraulic controls, the driver guides a robotic arm out to grasp, lift, and dump contents into the hopper on top of the truck. The automated collection system requires adequate room for the robotic arm to grasp the container. Container must be placed at least four feet from obstructions, such as mailboxes, other carts, fences, meters, poles, and vehicles.

### **Tips for Collection:**

Trash is collected once per week on Monday, Wednesday, and Friday's.

- Keep at least 4 feet clear around container to allow the robotic arm to grasp it.
- Place the container within 1 foot of the curb before 7:00 am on the designated collection date to ensure service.
- Place container so that the handles are toward the house and the lid opens toward the street.
- Remove the container from the curb/roadside **after** collection to prevent vandalism or theft.
- Trash should be bagged before you place it in the container. This helps tremendously to prevent litter from blowing on windy days.
- Trash should not stick above the tops of the container.
- Do not put hazardous liquids or chemicals, such as paint, oil, corrosive solvents, pool chemicals, or pesticides in the container. Many liquids or chemicals may become dangerous and hazardous when mixed in the container or in the collection vehicle.
- Do not put construction debris in your container, such as bricks, concrete or tile.
- Even though your container is sturdy, it can melt so never place hot ashes in it.

### **Ask a Question / Report a Problem**

If you have a question or problem, contact our **Utility Billing Department at (830)876-2476.**

Thank you for your attention and cooperation!
