

The City of Carrizo Springs

WATER USE

The hot summer days are here! Water use in the city is putting a strain on the water system. The wells and pumps are struggling to keep up with demand. The City is asking citizen's to voluntarily participate in reducing the strain by watering on specific days:

If your address ends in 0-3, you would water Tuesday and Friday.

If your address ends in 4 thru 6, you would water on Wednesday and Saturday.

If your address ends in 7 thru 9, you would water Thursday and Sunday.

It is strongly suggested that you water before 10 am or after 6 pm.

It is hoped that this voluntary effort will adequately reduce the strain on the city wells and pumps. Thank you for your understanding and participation.
